

		Area 1			Area 2			Area 3
POSTERS PROGRAM WEDNESDAY								
14.00-14.40	233	Ian Willoughby, Arne Vik and Kameran Aziz Consequences of an increase of axle load in Heavy Haul Operation on the existing bridge infrastructure	476	Khuliso Mulaudzi and Timothy Rangata Challenges and consequence of coal deposits and poor drainage to tunnel monitoring and maintenance.	356			
14.40-15.20	366		172	Li Huaxiang, Zhang Zhihe and Liu Peng High power permanent magnet direct drive technique and its research on technical advantages and difficultys	244	Fahad Almusaiteer Operating a Railway Through the Desert in Saudi Arabia: Challenges and Achievements		
16.10-16.50	323	Khuliso Mulaudzi and Timothy Rangata, (Bheki Biylea will present) Challenges and consequence of coal deposits and poor drainage to tunnel monitoring and maintenance.	309		338	Paras Sitoula, David Taniar, Maria Indrawan-Santiago, Paul Reichl and Ravi Ravitharan A framework for visualizing response exceedence data in map based 3d visualizations		
16.50-17.30	355	Veronica Jägare, Ramin Karim, Ulla Juntti and Peter Söderholm A framework for testbed concept in railway	310		13			

	Area 1		Area 2		Area 3
POSTER PROGRAM THURSDAY					
10.30-11.10	30		16	Mitsuru Hosoda Development of a Method of Protecting the Rail against Corrosion and a Rail Fastening System for Decreasing Anticorrosive Coating Injury	54 Wenzhou Li and Steve Cox The application of Pandrol Fastening system on MengHua 30t-axle load heavy haul railway in China
11.10-11.50	123	Atul Khare and Anshuman Sharma Mechanized Construction of Track and Over Head Electrical Installation on Dedicated Freight Corridor Projects in India	177	Refilwe Ndlela and Siboniso Vilakazi AN ANALYSIS INTO THE RELIABILITY OF RADIOGRAPHY TESTING AS AN ULTIMATE THERMITE WELDING QUALITY MEASURING TOOL	242 Tom Roadcap, Marcus S. Dersch and J. Riley Edwards Broken Spikes in Premium Elastic Fasteners for Timber Sleepers: Problem Magnitude and Root-Cause Analysis
14.00-14.40	168	Zhang Zhihe and Li Huaxiang The heavy-haul freight locomotive bogie with permanent-magnet motor and direct driving pattern	52	Qinglin Lian, Guanyu Deng, Xi Wang, Hongtao Zhu, Ali Al-Juboori, Zhiming Liu and Huijun Li Evaluating crack propagation in white etching layer of rail steel	99 Ralph Zhang and Helen Wu Using Non-Linear Finite Element Method and Empirical Studies to Optimise the Concrete Sleeper Design for Heavy Haul Operated Railway Track
14.40-15.20	142	Christer Stenström and Anders Sundgren Ultrasonic Testing of ReRail: The Environmentally Friendly Rail	223	Frédéric Delcroix, Thibaut Descamps and Lionel Winar NEW WAY OF ALUMINOTHERMIC WELDING AS A SOLUTION FOR HEAVY HAUL 4.0	256 Tanita Fossli Brustad, Aleksander Pedersen, Børre Bang and Rune Dalmo Representation of flexible transition curves in railway geometry

		Area 1	Area 2	Area 3		
POSTER PROGRAM FRIDAY						
08.30-09.10	266	Dongliang Huang, Lianheng Zhao, Shuaihao Zhang, Puhuai Lu and Changrui Jin Refined Research on the Geometrical Characteristics of Railway Ballast	294	Richard Stock, Wilhelm Kubin and Werner Daves Rail milling as integrated maintenance concept for Heavy Haul	368	Hallstein Gåsemyr and Celine Chapelier An increase in axle load up to 35.00 tons in Heavy Haul Operation on Ofotbanen, Norway
09.10-09.50	416	Arthur de Oliveira Lima, Jacob Branson, Ricardo Quirós-Orozco, Marcus Dersch and John Riley Edwards Field investigation of under ballast mat effectiveness to mitigate railway bridge transition zone differential movement	240		482	
10.30-11.10	272		331	Roar Andreassen, Rune Nilsen and Bjørn G. Larsen Finite element based estimation of lateral forces in heavy haul railway switches combined with strain gauges measurements	396	Mahdieh Sedghi, Osmo Kauppila, Erik Vanhatalo, Athanasios Migdalas and Murat Kulahci Data-driven Railway Maintenance Scheduling Based on Track Condition Prediction
11.10-11.50	180	Abe Meddah, Curtis Urban, Ali Tajaddini and Brian Marquis (Scott Cummings/Matthew Witte presents on behalf Track geometry and DOT-117 tank car dynamic performance	334		486	Bengt Bolsöy Breakthrough performance with a helix dumper system
